(APPENDIX) Appendix

Appendix – Data Sets

- BRFSS subset
- ALL clinical data
- ALL expression data

Appendix – Swirl

The following is from the swirl website.

> The swirl R package makes it fun and easy to learn R programming and data science. If you are new to R, have no fear.

To get started, we need to install a new package into R.

```r
install.packages('swirl')
```

Once installed, we want to load it into the R workspace so we can use it.

```r
library('swirl')
```

Finally, to get going, start swirl and follow the instructions.

```r
swirl()
```
